DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 8-11, 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eberle (US 6,062,409) in view of Barrash et al (US 6,048,423).

Eberle discloses a beverage bottle having contours on the sides of the bottle where a label is positioned. The label would lie flush with sections of the bottle while parts of the label would be raised from the side of the bottle where the bottle curves inward leaving only a vacancy between the label and the bottle. Eberle only mentions where the label would be placed. Barrash et al shows a label being placed on a beverage bottle using adhesive to hold. It would be obvious to one of ordinary skill in the art to use the process of Barrash et al to secure a label to the bottle of Eberle. Eberle only discloses the apparatus to be a beverage bottle. It would be obvious to one of ordinary skill in the art that wine is a beverage and could be held by the container of Eberle.

Response to Arguments

Applicant's arguments with respect to claims 1-6, 8-11, 17 and 18 have been considered but are moot in view of the new ground(s) of rejection.
